**Subject:** HP/COE Site - Follow-up items - sampling approach, access, outreach  
**Attachments:** EM001727-VI RES Work Plan Addendum\_010814.pdf; Access Agreement - Sampling.docx

Hi Paul, John & Mark,

I thought I would follow-up Roger's e-mail regarding the status of the Work Plan Addendum with some additional items:

The RP for one of our other South Bay groundwater sites - Teledyne Semiconductor/Spectra-Physics (Mountain View) - recently submitted an indoor air work plan addendum for residential sampling. This effort is similar to yours in scope - targeted re-sampling of residences from the phase 1 investigation over the highest concentration area of the groundwater TCE plume. Their sampling approach has shifted towards the passive diffusion sampler, and as we are still in discussions regarding the approach for the HP Site, I thought you might be interested to review their submittal (attached). Please note that EPA and the Regional Water Board are still in the process of reviewing this document and an official approval letter has not yet been issued.

I understand from Thelma Estrada, our attorney (whom I am copying on this e-mail), that HP/Varian is still considering the mechanism for obtaining access for the next round of residential sampling. In a recent discussion with your attorney Thelma indicated that EPA can obtain access...I wanted to reiterate that while EPA encourages RPs to obtain access for environmental sampling, we can certainly assist in the effort. Attached is an access letter we generated for the Teledyne Site...we can do something similar for HP/COE and attach to our outreach material.

Lastly, I am looking forward to our meeting in Palo Alto on January 23rd to discuss the community outreach. When I last spoke with Mark, he indicated that HP/Varian had some comments on the draft generic residential outreach letter I had sent, and that the companies' public affairs contacts were trying to reach out to Vicki/Alejandro to discuss the outreach materials. If there are comments/suggestions your team would like to provide on that draft letter in advance of our face-to-face meeting (or any other feedback, for that matter) we would certainly welcome them.

Sincerely,

Melanie
